

Temperature Detection *KIOSK*

Heatview Contactless Temperature Kiosk

Tangent's Heatview Temperature Detection Kiosks combine high-performance hardware with an industrial-class thermal camera to provide infrared thermal imaging for temperature detection and alerts. The Heatview supports automatic remote alerts and alarms for body temperatures over your preset thresholds. The Heatview provide expansion for IC card and fingerprint readers supporting gate security and attendance systems.

Tangent's Heatview Temperature Detection Kiosk provides a safe, cost-effective and efficient access control system for customers and employees.

Features

Heatview Temperature Detection Kiosk

- Industrial Grade Infrared Thermal Camera
- 2M Camera with LED flashlight
- 8" Screen w/ thermal detection & Facial Recognition
- 800x1280, IPS LCD panel
- Built-in Speaker for Alerts
